

ASP.NET MVC

Guidelines

Controllers

- ✓ Thin Controllers, Fat Models

Action Results

- ✓ One of the only places to use HttpContext

Url Helpers

- ✓ Keep all Urls in one folder

HTML Helpers

- ✓ No database calls allowed

Views

- ✓ Keep Views clean
- ✓ If using an 'if..then', put it in an HTML Helper
- ✓ Use partials to make Views more modular

Routing

- ✓ Minimize the number of routes for performance

Model Binders

- ✓ The second place to use HttpContext
